

AMENDMENT TO THE CLAIMS

1. (Currently Amended) A decorative transfer comprising a backing and ~~one~~two or more layers disposed on one side of the backing, wherein ~~the one or more~~ a first layers comprises an ink film on the one side of the backing and a second layer comprising a clear gel coat layer over the ink film, the clear gel layer comprising a tacky unsaturated polyester resin.

2-3 (Cancelled)

4. (Original) The decorative transfer of claim 1 wherein the ink film comprises an unsaturated polyester resin.

5. (Previously Presented) The decorative transfer of claim 1 wherein a protective release liner is disposed over the one or more layers.

6. (Original) The decorative transfer of claim 2 wherein the ink film and the clear gel coat layer both comprise unsaturated polyester resin.

7. (Previously Presented) The decorative transfer of claim 2 wherein the clear gel coat layer and the ink film both comprise isophthallic/Neopentyl glycol resin.

8. (Cancelled)

9. (Currently Amended) The decorative transfer of claim ~~8~~1 wherein the ink film comprises one or more pigments ~~and is substantially free of other tack reducers.~~

10. (Currently Amended) The decorative transfer of claim ~~8~~1 wherein the ink film comprises between about 1.0 percent by weight of tack reducers and about 10 percent by weight of tack reducers.

11-38 (Cancelled)

39. (Currently Amended) The decorative transfer of claim 1 wherein the ~~one~~two or more layers comprise a crosslinkable ink film and a crosslinkable tacky resin.

40. (Currently Amended) The decorative transfer of claim ~~11~~1 wherein the gel coat layer, the ink film and the tacky resin are crosslinkable.

41. (New) A decorative transfer comprising a backing and one or more layers disposed on one side of the backing, wherein the one or more layers comprise an unsaturated polyester resin ink film and a tacky resin.

42. (New) A decorative transfer comprising a backing and two or more layers disposed on one side of the backing, wherein a first layer comprises an ink film on the one side of the backing and a second layer comprising a clear gel coat layer over the ink film, the clear gel coat layer comprising a tacky resin wherein the ink film and the clear gel coat layer both comprise unsaturated polyester resin.

43. (New) A decorative transfer comprising a backing and two or more layers disposed on one side of the backing, wherein a first layer comprises an ink film on the one side of the backing and a second layer comprising a clear gel coat layer over the ink film, the clear gel coat layer comprising a tacky resin wherein the ink film and the clear gel coat layer both comprise unsaturated polyester resin wherein the clear gel coat layer and the ink film both comprise isophthallic/Neopentyl glycol resin.

44. (New) A decorative transfer comprising a backing and one or more layers disposed on one side of the backing, wherein the one or more layers comprise one layer forming an ink film and a tacky resin and wherein the ink film comprises the tacky resin.

45. (New) The decorative transfer of claim 44 wherein the ink film comprises one or more pigments.

46. (New) The decorative transfer of claim 1 wherein the ink film comprises between about 1.0 percent by weight of tack reducers and about 10 percent by weight of tack reducers.

47. (New)A decorative transfer comprising a backing and two layers disposed on one side of the backing the first layer comprising a color gel coat layer on an inner surface of the backing and a second layer comprising the ink film having the tacky resin.

48. (New) The decorative transfer of claim 47 wherein the gel coat layer, the ink film and the tacky resin are crosslinkable.

49. (New)A decorative transfer comprising a backing and one or more layers disposed on one side of the backing, wherein the one or more layers comprise a crosslinkable ink film and a crosslinkable tacky resin.
